About Heartlands:

Heartlands Baby Sanctuary is a temporary residential safe care facility that opened its doors 8 years ago. The facility aims to provide a safe haven and protection for children who desperately need it. It is saddening to know that not all children receive the care they deserve, and as vulnerable beings, we strive to be there for them. These are children who have endured **unimaginable abuse, neglect, and abandonment, or who may have disabilities that make them even more vulnerable.**

Throughout the years, we have been able to provide a home and make a positive impact on the lives of **381 children.** We have developed specialised programs to address their unique needs during their stay with us, and the results have been nothing short of remarkable. Witnessing how these children flourish and find happiness when they are shown love, care, and safety has been both heartwarming and heartbreaking at the same time.

Our ultimate goal is to reunite these children with their biological families. To support this, we have created a mother's room and a visitors' room where parents can maintain contact with their children. We also focus on providing training and support to parents, helping them understand and meet their children's needs, in hopes that they can continue providing care once the child returns home.

However, there are cases where reunification is not possible, and we must explore alternative placements such as foster care or transfer to long-term facilities. Unfortunately, due to the overwhelming demand, we often have to turn away children in desperate need because our capacity is already full.

This heartbreaking reality is why we have applied for an additional 5 bed spaces to accommodate more children. In order to continue providing this crucial service and assist the children who are in desperate need of care and protection, we humbly appeal to the public for any form of assistance they can offer.

What it takes for Heartlands to care for a child
